WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/JP2004/005825

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement			
Statement			
Novelty (N)	Claims	2-9, 11	YES
	Claims	1, 10	NO
Inventive step (IS)	Claims	7, 9	YES
	Clains	1-6, 8, 10-11	NO NO
Industrial applicability	(IA) Claims	1-11	YES
	Claims		NO
	Citations and Statement Novelty (N) Inventive step (IS)	Claims Inventive step (IS) Industrial applicability (IA) Claims Claims Claims Claims	Claims

Citations and explanations:

Claims 1, 10

Document 1: JP 2003-018686 A (Authentic, Ltd.), 17 January 2003, Full text; figures 1-3

The inventions of claims 1 and 10 do not possess novelty on account of document 1 cited in the ISR. "The edge of the vibrating plate (2) rides on a frame (1) and is fixed there," which is described in claims 1 and 10, is disclosed in document 1 as "a surface protection film ... is utilized as a vibrating plate, and its end ... is supported ... on the edge of a case."

Claim 2

Document 1

Document 2: JP 2002-252895 A (Hirohito KIN), 06 September 2002, Full text; figures 1-14

The invention of claim 2 does not involve an inventive step on account of document 1 and document 2 cited in the ISR. The transparent flat speaker described in document 2 and the speaker that uses a transparent surface protection plate as a vibrating plate as described in document 1 belong to closely interrelated technical fields; therefore, employing putting a vibrator 50 at each side as described in document 2 in the speaker described in document 1 could easily be conceived by a person skilled in the art.

Claims 3, 6, 8, 11

Document 1

Document 2

Document 3: JP 8-140185 A (Sanyo Electric Co., Ltd.), 31 May 1996, Full text; figures 1-13

The inventions of claim 3, 6, and 8 do not involve an inventive step on account of document 1 and document 2 cited in the ISR. The flat speaker described in document 3 and the planar speaker described in document 1 belong to closely interrelated technical fields; therefore, employing in the speaker described in document 1 the vibration supply unit that receives magnetic flux created from a magnet 3 for DC magnetic field generation whose drive coil 5 has more windings

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/JP2004/005825

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

in the lateral direction than in the vertical direction, and receives magnetic flux at an angle to or parallel to a vibrating plate 4 and vibrates the vibrating plate as described in document 2 could easily be conceived by a person skilled in the art.

Claims 4.5

Document 1

Document 4: JP 2002-533957 A (New Transducers Ltd.), 08 October 2002; Full text, figures 1-17

The inventions of claim 4 and 5 do not involve an inventive step on account of document 1 and document 4 cited in the ISR. The speaker with a transparent protective cover described in document 4 and the speaker that uses a transparent surface protection plate as a vibrating plate as described in document 1 belong to closely interrelated technical fields; therefore, disposing a vibrator 48 at the outside of a display device 51 on a case 41 and providing an electric wire extending to outside the case as described in document 4 and employing this in the speaker described in document 1 could easily be conceived by a person skilled in the art.

Claims 7, 9

Document 1

Document 2

Document 3

Document 4, full text, figures 1-8

The inventions of claims 7 and 9 are not disclosed in any of documents 1-4 cited in the ISR, and appear to possess novelty. In particular, "disposing a coil or magnet at the edge of a vibrating plate and forming the edge of the vibrating plate thinner than the center part" is not disclosed in any of the documents.
